

1 (April 1, 2002)  
2 Barrier delineators shall be placed on the traffic face of the barrier six inches down  
3 from the top. Spacing shall be as shown in the plans. Delineator color shall be  
4 white on the right of traffic and yellow on the left of traffic. The surface of the barrier  
5 where the delineator is applied shall be free of dirt, curing compound, moisture,  
6 paint, or any other material that would adversely affect the bond of the adhesive.  
7 Install delineators with an adhesive recommended by the manufacturer.
